

This FREE training opportunity was made possible through funding from the Massachusetts Executive Office of Housing & Economic Development.

Thank you to [MassHire Berkshire Workforce Board](#) and all participating companies that were part of the all-day plastics injection molding training on June 17 at the Berkshire Innovation Center. In addition to the classroom training by [Routsis Training](#), the 18 participants also had a tour of the SABIC facility on Plastics Avenue and a general overview of the equipment and technologies currently offered here at the BIC.
